CAREER OBJECTIVE

Highly motivated and passionate Web Developer seeking a career in a healthy working environment, with opportunities to contribute, learn, and grow within an institution. Flexible and willing to take on and learn any other positions that may better fit my qualifications.

WORK EXPERIENCE

Independent Freelancer

Baltimore, MD

Software Engineer

April 2020 - Present

- Debugging and developing applications and web pages to client's specification(s) using Frontend Frameworks such as HTML CSS Javascript and ReactJS
- Migrated an old WordPress dropshipping site to ReactJS and used Firebase to host the site and its database
- Built a ReactJS landing page for a client that features a fully automated form submission using NodeJs and Nodemailer
- Helped with debugging and updating certain pages on HBCU Pigskin Showdown's website
- Installed a WordPress theme for a web hosting company and adjusted styles based on client's request

College/Wyzant Tutor

Stone Mountain, GA

Javascript Tutor

July 2018 - May - 2020

- Worked with students both in-person and remotely, planning and delivering well structured lessons plans
- Became a volunteer tutor for my university teaching students how to program in C++, Python, and HTML
- Became a Wyzant tutor helping students debug and complete their course projects
- Staying up-to-date on the latest tech stack/version(s) in-order to deliver accurate lesson plans
- Demonstrating strong knowledge/continued interest in programming

PROJECTS

Washington's Direct (<https://wdftraining.com/>)

Front-end Engineer, UI/UX Designer

- Built a front end landing page using ReactJS, that would help funnel clients to Square appointment and Form submission
- Created a working form submission box using CSS, powered by EmailJS-com
- Utilized the npm package, dotenv, with EmailJS to help encrypt the API keys to help avoid spam.
